

# ScoreboardMax Network Allow List Request

Instructions for IT Administrators

## About ScoreboardMax

ScoreboardMax is a professional sports broadcasting utility designed specifically for school and community sports programs. The platform provides real-time scoreboard displays and overlays for live streaming broadcasts and requires internet connectivity to operate.

Our service is used by broadcasters, athletic departments, schools and volunteer organizations to enhance the viewing experience for fans who watch games remotely. The platform supports multiple sports including football, basketball, baseball, volleyball, wrestling, and soccer.

## Allow List Request

We respectfully request that the following domains be added to the allow list in your content filtering system to let broadcasters use ScoreboardMax from your facility:

### HTTPS Traffic (Port 443)

- ✓ `scoreboardmax.com`  
Primary domain for public-facing content and documentation
- ✓ `dashboard.scoreboardmax.com`  
User dashboard and management interface
- ✓ `app.scoreboardmax.com`  
Scoreboard overlay and control applications

### WebSocket Connections (WSS Protocol, Port 443)

- ✓ `ws.scoreboardmax.com`  
Real-time data synchronization for live scoreboard updates

## Content Safety & Security

ScoreboardMax is a utility platform with the following safety characteristics:

- ✓ **No user-generated content:** Users cannot post, upload, or share content that is publicly visible on domains on the allow list
- ✓ **No forums or social features:** The requested domains do not include chat rooms, comment sections, or social networking capabilities
- ✓ **No objectionable material:** Content is limited to sports statistics, team information, and scoreboard displays
- ✓ **Secure connections only:** All traffic uses HTTPS/WSS encryption (TLS 1.2+)
- ✓ **Professional use only:** Platform is designed exclusively for authorized sports broadcasting personnel

The platform functions as a closed utility system where authenticated users manage scoreboard data for their own broadcasts. There is no public interaction capability or exposure to unmoderated content.

## Technical Details

### Protocols Required

- HTTPS (Port 443) for web application access
- WSS - Secure WebSocket (Port 443) for real-time data updates

### Categories

If your filtering system uses categorization, ScoreboardMax should be classified as:

- Business/Professional Tools
- Sports (Broadcasting Utilities)
- Education (High School Athletics)

## Questions or Concerns?
